

# Order Verification Document SL150 Panel

L4.RF11011A  
09/29/2016

Please complete the following information and return to Union Corrugating.  
Production will NOT begin until this document is returned to Union.

To be complete by UCC

Customer: \_\_\_\_\_

Address: \_\_\_\_\_

\_\_\_\_\_

Approved By: \_\_\_\_\_

Date: \_\_\_\_\_

Project Name: \_\_\_\_\_

Panel Width: \_\_\_\_\_

Color: \_\_\_\_\_

Union Sales Order Number: _____
Union Sales Associate: _____
Date Issued to Customer: _____

Please return this document to Union Corrugating with signed sales order acknowledgment.

Panel Profile Option: (circle one from choices below)

Striated Profile  
(standard)

2 Pencil Ribs Profile (1/4" wide)  
(Disclaimer must be signed for this profile. See below.)

Smooth Profile  
(Disclaimer must be signed for this profile. See below.)

2 Bead Ribs Profile (Mesa)  
(Disclaimer must be signed for this profile. See below.)

### No Striations Disclaimer (Only required for panels without striated profile)

The perceived waviness in flat metal commonly known as "oil-canning" is an inherent part of light gauge cold formed metal panels. Union Corrugating Company will not accept "oil-canning" as cause for rejection of panel system. Panels supplied by Union without STRIATIONS are susceptible to oil-canning due to the wide, flat surfaces. Stiffening ribs and striations located in the flat pan of standing seam roof panels are means of reducing this condition. Striations break up the flat portions of the panel and minimize the visual perception of oil-canning.

By signing below I understand that waves and other surface variations are not reason for rejection of standing seam roof panels provided by Union Corrugating Company. I understand that panels made with no striations are more likely to exhibit these characteristics.
