

Warranties

We stand behind our products with the best warranty protection in the industry. Our broad range of substrates and paint systems has a wide selection of warranties to suit the needs of your application and ensure you have years of trouble-free service. We use industry-leading SMP (Siliconized Modified Polyester) and commercial grade PVDF paint systems that are coated on premium quality Galvalume® steel for outstanding fade, chalk, and corrosion resistance. Our new aluminum panels utilize our commercial grade PVDF paint system and are suited for those looking for the best in long-term corrosion resistance, especially in coastal areas.
