ML150 Panel

Please complete the following information and return to Union Corrugating.
Production will NOT begin until this document is returned to Union.

Customer: _____

Address: _____

Approved By: _____

Date: _____

Project Name: _____

Panel Width: _____

Color: _____

Clip Part Number: _____

To be completed by UCC

Union Sales Order Number: _____

Union Sales Associate: _____

Date Issued to Customer: _____

ML150 STRIATED PROFILE (standard)

Please return this document to Union Corrugating with the signed sales order acknowledgment.

OPTIONAL INSEAM SEALANT

Please check this box to include an in-seam sealant for this order. Additional surcharges may apply to the panel pricing.

YES, in-seam sealant required

Note: In-seam sealant is REQUIRED for all panels requiring a Weathertightness Warranty.

OPTIONAL NON-STRIATED PROFILES (DISCLAIMER ACKNOWLEDGEMENT REQUIRED)

To order a non-striated ML150 profile, check the box below for your preferred selection. Ordering a non-striated panel profile also requires a signed acknowledgement of the following Non-Striated Panel Disclaimer.

ML150 Smooth Profile

ML150 2-Pencil Rib Profile

ML150 2-Bead Mesa Rib Profile

Non-Striated Panel Disclaimer

The perceived waviness in flat metal commonly known as "oil-canning" is an inherent part of light gauge cold formed metal panels. Stiffening ribs and striations located in the flat pan of standing seam roof panels are means of reducing this condition. Striations break up the flat portions of the panel and minimize the visual perception of oil-canning. Panels supplied by Union without STRIATIONS are inherently susceptible to oil-canning due to the wide, flat surfaces.

Union Corrugating Company will not accept "oil-canning" as cause for rejection of panel system; Union Corrugating will not be liable for labor related to removal or installation of panels if a materials claim is filed.

By signing below, I understand that waves and other surface variations are not reason for rejection of standing seam roof panels provided by Union Corrugating Company. I understand that non-striated panels are more likely to exhibit these characteristics.
